When creating a hurricane preparedness plan, find the evacuation zone or route in your community. Before a storm is coming, make sure you know:

- Can I shelter in place safely at home during a hurricane, or do I live in a storm surge evacuation zone or other high-risk location that will require me to leave?

- If I need to evacuate, what is the best route from my home to my pre-selected destination?

Select your state and city to find your evacuation zone or route. If a local map for your area is unavailable or hard to understand, contact your local emergency management office to learn more.

*If your community has an available evacuation zone or evacuation route map that isn’t listed here, please share it with us at info@flash.org.*
